

Progress situation regarding fishing household survey in Batan Bay in Panay Island (Component 4)

Tsutom Miyata (Fisheries Research Agency)

The collected number of household survey was 474 in 2012 fiscal year and we had conducted analysis regarding Problems of fishing ground, Fisheries Management, Social Capital, welfare etc. We already present at academic meeting and will contribute to academic society in near future.

The first plan was to conduct above same survey in 2014 for comparison with the difference of fishers' consciousness before and after releasing black tiger prawn, but it was difficult to release it by hitting hyper typhoon etc. Therefore, we changed the purpose of survey in 2014 to the purpose of resilience from the disaster.

The additional question items of the origin were 1. Information about typhoon, 2. Preparation for typhoon, 3. Evacuation, 4. Damage as the following.

The second survey had been conducted from mid-July to early in September. We will input the original answer sheets in this fiscal year. And we will analyze the data set by comparative analysis.
